### BUSINESS SUMMARY:

MedRepair Rx, LLC is a medical equipment repair company serving the continental United States as well as international customers. We sell, calibrate and repair a variety of biomedical machines for civilians, doctors and hospitals, including patient monitors, patient monitors, EKG and ECG machines, gas analyzers, transmitters, telemetry machines, medical printers, medical display and much more.

### CAPABILITIES:

- **TRANSMITTERS:** We know how important transmitting patient data to the central monitoring station is, and we know how to keep those transmitters up and running. We provide peace of mind with our no-dropout guarantee on all transmitters. We perform board-level repairs on all transmitters from Philips and can repair a variety of complex problems.
- **GAS/ETCO2 MODULES:** Correctly monitoring a patient's gases is an important part of our job. From occlusions to incorrect gas values, we can repair your gas analyzers to OEM specs. As a courtesy, we calibrate all gas analyzers we repair.
- **LIGHTING:** Every medical office has lighting, from endoscopic to overhead, and our lighting can mean life or death. We have the ability to repair these devices so they stay on when you need them, every time.
- **MEDICAL PRINTERS:** Medical imaging is an important part of the diagnostic process. The image must be accurate, visible and consistent. We can repair numerous issues with medical printers.
- **DISPLAYS:** Medical displays are a necessity in today's market. Don't struggle to see the screen any more—we can fix that. From bad inverters to blown-out backlights, we can return your display to working order.
- **FETAL HEART MONITORS:** Accurately measuring the baby's heart rate and the mother's contractions are a must during the delivery process. With our fetal monitor repair service, you can rest assured that these vital tools will work when you need them.
